

YOUR LAB CHOICES:

Our biggest goal here at Hormones by Design is to keep your care affordable. You have two choices for your lab charges. Each of these choices has pros and cons and we would like to ensure that you understand your choices. **It is the responsibility of the patient to know and understand the lab benefits that are part of your insurance.**

Choice #1: Pay our office for your labs.

PRO: We have very affordable lab prices, for example hormones like estradiol and testosterone are \$15 each. So, you would pay us \$30 for those labs.

CON: Your labs will not be sent to your insurance and will not apply to your deductible if you are trying to meet it.

Choice #2: Let your labs be billed to your insurance by the lab.

In this scenario, the lab will bill your insurance (using the example above, each of those hormones bill out at \$225 per test).

PRO: If you are sure of your lab benefits, this can be covered by your insurance with no out-of-pocket expense.

CON: At this point, your bill is now completely out of our control and the charges cannot be reversed. If your insurance fails to cover your labs, you are responsible for the entire amount billed. This is why it is very important to know your lab benefits.

If you receive a bill from the lab and have already paid us for your labs, please call our office directly. Please DO NOT call the lab as they will immediately ask for your insurance information and once billed, we have no recourse.

Thank you for choosing HBD for your care.

Sincerely,

Hormones by Design

CONSENT TO TREAT & NOTICE OF OFF-LABEL USE

SAFETY OF HORMONE REPLACEMENT & OFF-LABEL DRUG USE

What is considered off-label drug/prescription use?

1. It is considered off-label use/alternative medicine if you are on any compounded form of medication. Please note that compounded medications do not meet FDA approval and therefore are considered off-label.
2. It is considered off-label use/alternative if you are on a medication which is being used outside of the medication labeling offered by the package insert.

Drug labels are specific to the disease they treat and therefore if the medication is used to treat a disease that is not specified in the label, then the agent is being used off-label. Additionally, any change to the approved dose, frequency or route of administration would constitute an off-label use.

The use of off-label medications is common practice among the medical community and while we are not legally required to obtain a signed written consent it is the belief of this practice that the patient be fully aware of the current treatment plan recommended including its risks, benefits and alternatives to your plan of care. Remember that even over the counter medications carry risks when taken. It is our belief that the treatment of hormone deficiencies can be of great benefit in improving quality of life

Medications and supplements which may be used off-label or as alternative medicine can include but are not limited to the following: armour thyroid, estriol, estradiol, progesterone, DHEA, and/or testosterone via pellets, injections or in compounded formulations. The use of supplements may also be used in an effort to help improve conditions and or symptoms that you may have presented with during your initial consultation and throughout the course of your visit.

If you experience any side effects associated from current prescribed medications please call the office immediately. If it is after usual business hours and you should have severe side effects please proceed to the nearest emergency room or urgent care facility for appropriate treatment.

While hormone therapy will not cause cancer, the use of hormones could potentially make an estrogen and/or progesterone positive cancer grow. Most breast cancers fall into this category.

As a patient you have the right to refuse any off-label use of the medication being prescribed. You also have the right to ask questions regarding the current treatment plan as well as alternatives to what is being prescribed. If you have any questions or concerns please make sure to discuss with your provider during your consultation and any future visits.

FEMALE PATIENTS DESIRING HORMONE REPLACEMENT

The reasonable alternatives to this treatment are:

1. Leaving the hormone levels as they are.
2. Treating age related diseases as they appear.
3. Using pharmaceutical agents that are not bio-identical in nature.

Possible side effects for women on estrogen, progesterone and/or testosterone (in any method of delivery) include: breast swelling or discomfort, fluid retention, dizziness, break through bleeding, acne, unwanted hair growth, headaches, increased risk of heart attack, stroke and other cardiovascular problems, increased risk of gallbladder disease, increased risk of blood clots; worsening of: ovarian cysts, uterine fibroids, endometriosis, and fibrocystic disease.

Contraindications: Do not use hormone replacement if you have a known history of reproductive system related cancers such as breast cancer, ovarian cancer, uterine cancer. Exceptions include reproductive system responsive cancer which has been under remission for over 5 years.

I also understand that if I am female and become pregnant, I should stop the entire treatment protocol immediately and notify my primary physician. I understand that this hormone therapy is not for the purpose of preventing pregnancy, and that if I become pregnant on this therapy it could present risk to the fetus (unborn child).

I have provided the office with a copy of my most recent pap and mammogram (if these tests were not completed by this office) and the results are within one year of this appointment.

(Initial) I understand the possible treatments and side effects

ALL PATIENTS: OBLIGATIONS & REPRESENTATIONS

Any questions I have regarding this treatment have been answered to my satisfaction. I will comply with the recommended dose and methods of administration. I also agree to participate in the initial and subsequent blood testing as required to monitor my hormone levels.

I have disclosed accurate and true information regarding my medical history, medications, and surgeries.

I certify that I am under the regular care of another physician for all other medical conditions. I will consult my primary care physician(s) for any other medical services I may require. I understand that this is a specialized practice. I also understand that I will continue under the care of my other physician(s) for any on-going medical condition as well as for any medical consultation that I may need.

I assume full liability for any adverse effects that may result from the non-negligent administration of the proposed treatment. I waive any claim in law or equity for redress of any grievance that I may have concerning or resulting from the therapy, except as that claim pertains to negligent administration of the therapy.

I fully understand the nature and purpose of portions of the aforementioned treatment may be considered experimental because of the lack of adequate scientific evidence or peer-reviewed publications supporting the underlying premise of bio-identical hormone replacement therapy and that such therapy might even be considered by some medical professionals to be medically unnecessary because it is not aimed at treating a particular disease.

I understand that I may suspend or terminate treatment at any time and hereby agree to immediately notify the physician of any such suspension or termination.

I also understand there are possible benefits associated with this therapy but that no guarantee has been made to me regarding the outcomes of this treatment. I also understand that the benefits derived from antioxidant therapy, hormone therapy and drugs that alter hormone levels will cease or reverse if the therapy is discontinued.

ALL PATIENTS: CONSENT

I hereby authorize my physician to evaluate and treat the conditions I specified above. I understand that my physician may be assisted by other health professionals, as necessary, and agree to their participation in my care as it relates to the evaluation and treatment of the conditions this Consent to Treat covers. I am competent to sign this Consent to Treat and have done so of my own free will.

**NOTICE OF HEALTH INFORMATION PRACTICES
ACKNOWLEDGEMENT FORM**

I acknowledge that I have received the Notice of Health Information Practices of Hormones by Design and this notice describes how medical information about me may be used and disclosed and how to get access to this information.

I understand that the organization reserves the right to change its notice and practices and, prior to implementation, will mail a copy of any revised notice to the address I've provided. I understand that I have the right to request restrictions as to how my health information may be used or disclosed and that the organization is not required to agree to the restriction requested. I understand that I may revoke this consent in writing, except to the extent that the organization has already taken action in reliance thereon.

I wish to have the following restriction to the use or disclosure of my health information:

PATIENT NAME (PRINTED)

DATE

Patient Handbook

Welcome!

This handbook should help you discover how we differ from a traditional medical practice and outlines our office policies. Please feel free to ask our front desk staff if you have any questions.

When You Arrive

- When you first arrive, please register with the receptionist. You will be given an update sheet to fill out at every visit. This update sheet will need to reflect your current symptoms & any medication changes, etc.

When You Are Late for an Appointment

- Your time is valuable, and so is the doctor's/nurse practitioner's.
- Please be prompt.
- If you arrive 10 minutes or more after your scheduled appointment time, your appointment will have to be rescheduled.

Canceling Your Appointment

- Please give us 24 hours advance notice so that we may offer that appointment to someone on our waiting list.
- Unlike other medical practices, we do not charge a fee when patients fail to show up for an appointment. However, after three no-shows without notification, we will be forced to release you from our practice. We tend to have a full schedule every day. Late and missed appointments disrupt patient flow and unnecessarily prevent other patients from being able to schedule appointments during those missed slots.
- If you are a new patient and you do not show up for 2 consecutive appointments, and you do not call to cancel, you will be released from the practice.

When You Need Us After Hours

- When you call our office after hours, you will be directed to our answering service or voice mail.
- If you are experiencing a medical emergency or you believe you are experiencing a life-threatening situation, call 911 immediately, or go to the emergency department of your nearest hospital.
- If your urgent medical need is not life threatening, and it is during normal business hours, please call the office. We will help you determine the best plan of care.

Lab Testing

- We know that you want to know the results of your lab tests as soon as you can. Our office policy is that all patients must make a follow-up appointment with the doctor or Nurse Practitioner to go over lab results & determine a plan of care.

Prescriptions

- When you need a prescription refilled, contact your pharmacy. The pharmacy will notify our office via fax.
- For all patients on hormone or thyroid therapy, our office requires labs at least every 6 months in order to maintain refills.
- Please do not allow yourself to run out of medication. Most of the medications that our office prescribes are specialty or compounded and it can take several days for your pharmacy to fill your prescription.

Thank you for choosing our practice for your healthcare needs!

I have read and agree to the above office policies.
